Art Unit: 1651

### **DETAILED ACTION**

Claims 1-9 and 20-30 are pending.

### Election/Restrictions

1. Applicant's election of claims 5 and 30 in the reply filed on May 14, 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The requirement is still deemed proper and is therefore made FINAL.

- 2. Claims 1-4, 6-9 and 20-29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.
- 3. Claims 5 and 30 are examined on the merits in this office action.

### Information Disclosure Statement

4. The information disclosure statement filed April 14, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Specifically, a copy has not been provided for each foreign patent. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Art Unit: 1651

- 5. The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2), which requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).
- 6. The information disclosure statement filed May 28, 2008 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in

Art Unit: 1651

the English language. It has been placed in the application file, but the information referred to therein has not been considered.

# Claim Rejections - 35 USC § 112

- 7. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 8. Claim 30 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 9. Claim 30 provides for the use of fibrin for inducing angiogenesis, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

### Claim Rejections - 35 USC § 101

10. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

11. Claim 30 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under

Art Unit: 1651

35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd.* v. *Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966). Claim 30 provides for the use of fibrin for inducing angiogenesis, but does not set forth any steps involved in the method/process.

## Claim Rejections - 35 USC § 102

12. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 13. Claims 5 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by MacPhee et al. (US 6,197,325 B1). Claim 5 recites a method of inducing angiogenesis comprising treating a living body with fibrin. Claim 30 recites the use of fibrin for inducing angiogenesis.
- 14. MacPhee teaches a method of treating a patient with a bandage comprising fibrin (col. 10, lines 9-17). The reference teaches that the bandages promote angiogenesis (col. 7, lines 4-21).
- 15. Therefore, the reference anticipates all of the limitations of the claims.
- 16. Claims 5 and 30 rejected under 35 U.S.C. 102(b) as being anticipated by Spotnitz et al. (WO 01/21195 A1). Claim 5 recites a method of inducing angiogenesis

Art Unit: 1651

comprising treating a living body with fibrin. Claim 30 recites the use of fibrin for inducing angiogenesis.

17. Spotnitz teaches a method of treating an animal with a fibrin-containing composition (abstract, p. 8). Spotnitz teaches that the fibrin matrices promote wound-healing, and thus would inherently induce angiogenesis (abstract).

18. Therefore, the reference anticipates all of the limitations of the claims.

#### Conclusion

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHERIDAN R. MACAULEY whose telephone number is (571)270-3056. The examiner can normally be reached on Mon-Thurs, 7:30AM-5:00PM EST, alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn can be reached on (571) 272-0926. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
